

V-Shaped dry cooler

DV/DX/KDV: V-Shaped dry coolers with axial fans for outdoor use

Cooling capacity from 90 kW to 1200 kW

Outdoor installation

Low Noise

AC fans

High efficiency

Natural Refrigerant

Floating pack system

ROEN EST's V-shaped dry coolers with axial fans are suitable for outdoor applications, using highly sustainable R718 refrigerant and brines. Configurable for low noise levels and capacity to exactly match system requirements. Compared to cooling towers and wet systems, our V-shaped dry coolers require little maintenance and fare highly effective in preventing Legionella contamination. The V-shape is ideal for remote installations where footprint is limited.

FEATURES

- Use H₂O natural refrigerant and brine
- **Finned coil:** Built with 1/2" copper tubes and louvered aluminum fins. Designed with 'Floating pack system', which allows the coil to levitate to avoid leaks
- **Fans:** Equipped as standard with AC fan motors. Axial fans with external rotor (380-480V III 50/60Hz) Compliant with ErP Directive Ø 800, 910 mm
- **Casing:** Pre-painted aluminum
- **Design pressure: PS=30bar PT=43bar**

OPTIONS

FIN MATERIAL

- Copper Fins
- Coated Fins
- Other not standard fin material

CASING

- Anti dampers

ELECTRICAL OPTIONS

- EC fans
 - Speed controller
 - Wiring into centralized box (included with EC Fans)
 - Service switch
- Wiring + Magnetothermics

OTHER

- AquaAero
- Blygold
- Spray adiabatic system
- Pads adiabatic system (coming soon)
- Fan diffuser

APPLICATION

IT cooling

Industry

Oil & Gas
