

# Natural Refrigerant Solutions

FOR REFRIGERATION  
AND PROCESS  
COOLING

# Cooling naturally

Our leading natural refrigerant, energy efficiency and energy transition technologies transform the HVACR industry.

# Natural Refrigerant Industrial Chillers

## Climate pioneers

We are the only European champion of all natural refrigerant solutions for the HVACR industry. Our mission as a **Climate Tech** pioneer is to bridge the gap between innovation and impact, while offering our customers superior performance and results.

## Environmentally friendly

Enex Technologies offers **high quality** chillers for **efficient and sustainable cooling** for a multitude of industrial processes and refrigeration applications.

## Widest range on the market

We have the perfect chiller for **any industrial application**. From the food industry to pharmaceuticals, chemicals and metallurgy, we have the right **solution for you**.

## Efficient chillers, smart energy

Our chillers are designed for **maximum energy efficiency**, reducing your energy consumption and carbon footprint. With **cutting-edge technologies**, we help you **save money and protect the environment**.

**MEDIUM COOLING CAPACITIES**  
**CO2 TRANSCRITICAL SPLIT AIR-COOLED RECIPROCATING CHILLER**  
with remote gas cooler

**REMOTE GAS COOLER**  
with axial fans for outdoor use

**MEDIUM COOLING CAPACITIES**  
**PROPANE PACKAGED WATER-COOLED RECIPROCATING CHILLER**  
for indoor and outdoor use

**DRY COOLER**  
with axial fans  
for outdoor use

**SMALL COOLING CAPACITIES**  
**PROPANE PACKAGED AIR-COOLED RECIPROCATING CHILLER**  
for outdoor use

**MEDIUM COOLING CAPACITIES**  
**PROPANE PACKAGED AIR-COOLED SCREW CHILLER**  
for outdoor use

**LARGE COOLING CAPACITIES**

**AMMONIA PACKAGED AIR-COOLED SCREW CHILLER**  
for outdoor use for high cooling capacities

**AMMONIA CUSTOM PACKAGED REFRIGERATION CHILLER**  
for outdoor use (air cooled, water cooled or cooled by evaporative condenser)

**LARGE COOLING CAPACITIES**

# Industries & Applications

Our game-changer climate solutions are central to reducing global warming and reach a carbon-neutral future.

## APPLICATIONS
